

Gargee Moni Jose

Senior Product Designer — UI/UX

gargeejose@gmail.com | +91 8547797308 | LinkedIn | Portfolio | Kochi, India

PROFILE

Product Designer with 5 years of experience designing enterprise SaaS, AI-powered products, and complex workflow-heavy interfaces. Experienced across user research, information architecture, interaction design, visual design, prototyping, design systems, and developer handoff. Strong Figma practice with component libraries, variants, Auto Layout, reusable interaction patterns, and AI-assisted workflows using Claude and Cursor. Comfortable working closely with product, engineering, operations, and stakeholders to simplify complex requirements into clear, usable products.

PROFESSIONAL EXPERIENCE

UI/UX Designer | Cliniqon RCM Pvt. Ltd. — Product Company | Aug 2025 – Present

- Lead product design across CRM, Medical Coding, Clinical Auditing, RCM, HR, and internal workflow platforms, translating complex business processes into structured, usable web applications.
- Led 0-to-1 design of the Clinical Auditing workflow, reducing average task completion time by an estimated 25% by turning a manual audit process into a guided digital workflow.
- Standardized reusable interaction patterns across 6 enterprise products through a shared component library, reducing design-to-development handoff time by an estimated 20%.
- Run stakeholder and usability research and translate findings into user flows, information architecture, wireframes, prototypes, high-fidelity interfaces, and interaction states.
- Design complex workflows with alternate states, edge cases, validation, empty states, errors, and other failure modes so business users can complete tasks accurately.
- Partner directly with product, engineering, and operations from requirements through implementation, resolving technical constraints and interaction details and performing design QA.
- Apply responsive design and WCAG 2.1 accessibility principles across web applications while balancing user needs, business requirements, and implementation constraints.

Creative Designer | Freelance | Mar 2025 – Aug 2025

- Built an independent design practice delivering UI/UX, branding, and 0-to-1 digital product design across 4+ industries.
- Owned projects from discovery and research through information architecture, interaction design, visual design, prototyping, handoff, and final delivery.
- Worked directly with clients and stakeholders to clarify goals, explain design decisions, and turn ambiguous requirements into practical product experiences.

Senior UI/UX Designer | Lifology Pvt. Ltd. — Product Company | May 2024 – Mar 2025

- Led 0-to-1 design and launch of an AI-powered SaaS coaching platform within 6 months, covering research, information architecture, interaction design, visual design, prototyping, and developer handoff.
- Designed interfaces around AI-generated insights and complex coaching workflows, focusing on making AI-supported information understandable and actionable for users.
- Built reusable Figma components and interaction patterns to support consistency as new workflows and features were added.
- Worked closely with product and engineering to evaluate workflow states, edge cases, technical constraints, and implementation trade-offs before and during development.
- Used usability testing and A/B testing on key user flows to validate design decisions and identify opportunities for UX improvement.
- Mentored two junior designers on design methodology, critique, component reuse, and execution standards.

UI/UX Designer | Vonnue Innovations Pvt. Ltd. — Service Company | Jan 2022 – Jan 2024

- Served as PIC and PoC across 10+ client accounts, owning UX research, information architecture, interaction design, UI design, prototyping, motion design, and content strategy.
- Designed SaaS products, responsive web applications, and business websites from research and wireframes through high-fidelity UI, prototypes, and developer handoff.
- Built scalable design systems and reusable component libraries adopted across 8+ projects, reducing design production time for new features by an estimated 15–20%.
- Created interactive prototypes and micro-interactions and used usability feedback to refine workflows and interaction patterns.
- Designed responsive websites using Wix and Editor X with a focus on usability, consistency, and performance.

Graphic Designer | Sacred Heart College, Thevara | Apr 2021 – Oct 2021

- Managed the college website and blog while maintaining consistent visual and brand standards.
- Developed a campus signage system and produced digital and print assets in collaboration with college management and staff.

EDUCATION

MA, Graphic Design — Sacred Heart School of Communication, Thevara (Jul 2019 – Mar 2021)

BA, Animation and Graphic Design — Sacred Heart School of Communication, Thevara (Aug 2016 – Mar 2019)

SKILLS

Product Design: Enterprise SaaS, B2B SaaS, 0-to-1 Product Design, User Research, Information Architecture, Interaction Design, Visual Design, User Flows, Wireframing, Prototyping, Usability Testing, Responsive Design, Accessibility (WCAG 2.1), Design QA

AI Product Design: AI-powered SaaS, AI-assisted workflows, AI-generated insights, human-in-the-loop workflow concepts, prompt/interaction exploration, AI-assisted design

Systems: Design Systems, Component Libraries, Components & Variants, Auto Layout, Reusable Patterns, Interaction States, Design Tokens, Edge Cases & Failure Modes, Developer Handoff

Collaboration: Product & Engineering Partnership, Stakeholder Management, Design Critique, Agile/Scrum, Requirements Analysis, Written Design Rationale

Tools: Figma, Adobe Photoshop, Illustrator, XD, Acrobat, InDesign, Premiere Pro, After Effects, Wix, Editor X, Claude, Cursor

AI-ASSISTED DESIGN

Use Claude for requirements, scenarios, edge cases, UX copy, synthesis, and design exploration; use Cursor for implementation-oriented exploration and understanding frontend behavior. Use AI to accelerate exploration and repetitive work while keeping product decisions,

interaction logic, accessibility, and visual quality under direct design ownership.
